WORK EXPERIENCE

ACCENTURE |

Packaged App Development Associate

Gurugram, Haryana

Aug 2023 – Present

- Contributed significantly to the Salesforce-based global app, designed to empower Accenture operations.
- Worked as Salesforce Lightning Developer aligning technical solutions with business needs.
- Engaged extensively on Standard and Custom Salesforce configuration, Profiles, Roles, Objects, Fields, Validation Rules, Workflow rules, Sharing rules, Process Builder, Approval Process, Role Hierarchy, Page Layouts, security, Reports and Dashboards, Lightning Web Component, Apex Classes, Apex Triggers, SOQL, SOSL, Visualforce Pages, Data Loader, Integration and Admin responsibilities.
- Demonstrated proficiency in creating and writing test classes to achieve comprehensive code coverage exceeding 75%.
- Led creation of customized flows, applications, objects, tabs, and fields tailored to project requirements.
- Utilized Front-end expertise in CSS, JavaScript, and JS frameworks to enhance UI design and functionality.

DATADEWINS |

Trainee - Internship

Remote

Jul 2021 – Sep 2021

- Minimal Linux and DevOps internship focused on creating a web development environment on Linux.
- Created a Makefile with 4 targets (Prepare, Up, Teardown, Down) to establish a consistent development environment for a PHP team.
- Technologies utilized: MySQL, PHP, Bash scripting, Vim text editor.

PROJECTS

GOOGLE DOCS CLONE |

Next.js, Draft.js, Firebase, Tailwind

- Designed and developed a collaborative document editing platform inspired by Google Docs using Next.js ensuring responsiveness and a smooth user experience.
- Integrated Draft.js to provide a rich text editing experience with features such as formatting, inline styling and collaborative editing.
- Implemented real-time collaboration features using Firebase Firestore Database.

PROMPTOPIA |

Next.js, NextAuth, MongoDB, Tailwind

- Promptopia, a Next.js web app, enables users to discover, create, and share creative prompts for AI like chatGPT, with seamless Google Sign-In integration, automatically creating profiles upon sign-in.
- The feed displays prompts with creator names, content, and tags. Authenticated users can create, edit, delete, manage prompts through their profiles.
- Navigation bar offers easy access to key sections, adaptable for desktop and mobile.
